DESCRIPTION

This project provides for the installation and upgrading of streetlights countywide with emphasis on residential fill-in areas, high crime areas, pedestrian generator locations, and high accident locations. This project also provides for the replacement of streetlights that are knocked down, damaged, or have reached the end of service life. Streetlights that pose safety concerns and are no longer functioning to the specifications of original installation are also replaced under this project.

Service Area

Countywide

JUSTIFICATION

County resolution dated June 25, 1968, requires Montgomery County to provide for the installation of streetlights in those subdivisions that were platted prior to February 1, 1969, when the installation of streetlights was not a requirement of subdivision development. This project provides funds for these streetlight installations, as well as for lighting of the public right-of-way when the existing lighting is substandard to the extent that public safety is compromised.

Plans and Studies

New streetlight plans are developed in conformance with established County streetlight standards and are normally implemented under contract with the pertinent local utility company. A pedestrian impact analysis has been completed for this project. The March 2005, "Report of the Infrastructure Maintenance Task Force," identified streetlighting in need of lifecycle replacement.

Cost Change

Increase due to the addition of FY11-12 to this ongoing project.

STATUS

Ongoing

OTHER

The six-year program for streetlighting in Silver Spring will be completed during FY06. *Expenditures will continue indefinitely.

APPROPRIATION AND EXPENDITURE DATA
